

Experts in digital forensic investigation

Forensics

More and more companies fall victim to Cybercrime such as fraud, industrial espionage, phishing or hacking. Fox-IT has begun the fight against Cybercrime. Our forensic IT experts conduct digital research and are specialized in recovering and interpreting digital traces. Fox-IT's expertise ensures you of a correct investigation which will be valid in court.

Experts in recovering digital traces

Each company can become a victim of Cybercrime, e.g.:

- attacks on vital IT infrastructure
- stealing confidential information
- financial fraud
- violation of corporate policies
- using digital means for extortion

The forensic IT experts are specialized in recovering and interpreting digital traces. After our investigation you will receive a full report with the results. Our reports can be used within civil- and criminal investigations in court.

Digital forensic investigation is rapidly changing

Cyber attacks become more focused. In the past, Cybercriminals only focused on computers when they wanted to gain access to specific data. Now, they have access to more digital systems. Besides researching computers Fox-IT is able to research other digital systems like mobile phones, navigation equipment, virtual environments and large email environments. We are able to analyze huge amounts of data and are specialized in cloud computing.

Forensic Readiness

In a world where cybercrime is growing rapidly, organizations should think about the unthinkable. Don't leave things to chance. Unexpected security incidents don't have to disrupt day-to-day operations. You can manage them. Forensic Ready companies manage this. They know incidents will occur, and they are prepared. They align business goals with risk management, they think about what information they need to conduct a decent investigation. Forensic Readiness helps to control the processes, instead of being controlled by them. Investigations don't interfere with day-to-day operation. Money isn't lost.

24 x 7 available

In case of an incident it is crucial no time is lost. The forensic team of experts are available 24x7 and can be on sight within a few hours. Research will be done at our forensic lab at our headquarters in Delft, the Netherlands. With our mobile lab we can conduct research worldwide on every location.

Why Fox-IT

Besides a large team of forensic IT experts, we have specialized cryptographic and programming knowledge. This enables us to solve any security issue you might have. All our employees have been screened and trained to deal with confidential information.

We are available 24x7 and ready for any security incident that may occur within your organization.
